Watches that are designed splash proof are suitable for wearing whilst water is being splashed. NOT under any pressure (i.e. swimming and showering).

Watches that are designed water resistant have been tested to 50 metres static water pressure unless otherwise stated. These watches are suitable for wearing whilst swimming.

Our suppliers adopt a policy of continuous improvement. Hence there may be changes in the catalogue, model variations in models, specifications and colours.

All quartz watches are dependent on batteries for their power source. Accordingly, customers returning watches with expired batteries will be charged for the fitting of replacement.

Now you can choose telephone products in the same way as you choose all your other household items. You buy your telephones outright and you only pay rental on the exchange line.

All Argus telephones are fully approved for use with British Telecom systems. They plug straight into the new style B.T. jack-socket.

What if you don't have the new style British Telecom jack-socket? Simply telephone your local B.T. sales office and they will arrange for installation. They will connect all your existing telephone connections to the new jack-socket system for a small charge.

The number of telephones you can connect to a line is determined by the "Ring Equivalent Number" (REN) of each telephone you wish to connect. The maximum REN for a B.T. line is 4. This means for example, that a maximum of 4 telephones each with a REN of 1 could be connected to the same line.

Remember, when you buy your phone, you only pay rental on the exchange line.
